EDUCATION

B.Sc. in Computer Science

University of Hail, Saudi Arabia

- First Class Honours & EU Blue Card eligible university and degree.

08/2016 - 12/2020

SKILLS

- **Frontend** | React | Next.js | Redux | Bootstrap | MUI | Tailwind CSS

- **Backend** | Node.js | Express.js | Laravel | Livewire | Django | RESTful APIs

- **Database** | MySQL | MongoDB | PostgreSQL | Firebase

- **Mobile** | Flutter | React Native | Provider | JSON

- **Environment** | Windows | Linux (Debian & Fedora)

- **Hosting** | cPenal | VPS | Azure | Vercel | GitHub

- **Other** | Git | JWT | OAuth2 | OTP | Twilio | Open Source

LANGUAGES

- **English** (Conversational)

- **Arabic** (Fluent)

PERSONAL PROJECTS:

Instagram Clone - a full stack **Flutter** application ([APK build](#)):
- Using Flutter (3.7) with **Firebase** to manage the backend.
- Implemented authentication and authorization, update their profile (add a profile picture), CRUD posts, like, comment, follow/unfollow other users and search other users by username.
 - https://github.com/Mohamed-Ebeid/flutter_instagram_clone

Study Buddy - a **Django** web application to help user to study different topics by creating rooms:
- Using **Tailwind CSS** and Django with PostgreSQL/sqlite3 to manage the back end and database.
- Implemented authentication and authorization, update profile (picture, bio…) and perform CRUD on rooms with title and topic.
- Users can also preform CRUD comments on the room, see activities of other users (comments) with search implemented.
 - https://github.com/Mohamed-Ebeid/Django-Studybuddy

Link App - a full stack **React Native** app to share useful websites with other users:
- Using React Native with **NodeJS**, ExpressJS and MongoDB to manage the backend.
- Implemented authentication, update profile, reset password (OTP send to the email), CRUD link posts with search and paginations.
- Users can browse the links (using webView), see other users' profiles with their links and see the most popular links (most visited).
 - https://github.com/Mohamed-Ebeid/linkapp-frontend & https://github.com/Mohamed-Ebeid/linkapp-backend

Larajobs - a **Laravel** 9 web application to apply for jobs ([click here for lthe ive deploy](#)):
- Using Tailwind CSS to manage the front end.
- Implemented authentication and authorization, CRUD job posts with search and pagination.
- p.s.: since the hosting is serverless (Vercel), uploading pictures (logo) isn't available.
  - https://github.com/Mohamed-Ebeid/Larajobs

Blue Amazona - an Amazon clone using the **MERN stack** ([click here for the live deploy](#)):
- Using React and Bootstrap to manage the front-end with NodeJS and ExpressJS to manage the back-end with MongoDB with middleware authentications.
- Implemented authentication and authorization, cart, search/filter products, checkout, pay methods (Stripe & PayPal) and order status.
- Admins can perform CRUD operations on the products, view/edit users and view/update orders. Admin email: admin@awesome.com admin password: 123456 (enjoy!).
  - https://github.com/Mohamed-Ebeid/mern_Blue_Amazona
